Groupe JPL has taken over Flexo-Line of Saint Just Malmont (Auvergne). With this take-over, JPL strengthens its leadership on the French self-adhesive label market. The JPL Group now accounts for a € 36 million consolidated turnover and employs 235 people. Major advantage of Flexo-Line is the technical possibilities provided by an ETI Labeline machine with in-line coating and laminating technology. The JPL Group can now produce and adjust its own label stock to offer its customers original and custom-built products. The JPL Group has five production sites near Lyons, Paris and Rouen, equipped with 39 rotary presses.
