

SMAG

Booth 1647

DIGITAL PRESS

SMAG showcases its flagship Galaxie digital press with unwinder, flat bed screen print station, semi-rotary hot foil, semi-rotary diecutting and converting section. Also at the SMAG booth is a Comet Digital finishing unit with flexo, cold foiling, semi-rotary diecutting, and converting section, and the new Offline Priming Solution which is having its US launch. This primer, with IR/hot air UV drying can treat films down to 30 microns. It is designed for priming substrates prior to digital printing.
