The Galaxy screen press from Smag

Client spotlight: Smag in France

Smag is a French manufacturer of semi-rotary screen presses for the printing industry. The company has a long history of innovation and quality, and is known for its reliable and efficient machinery.

Client spotlight: Smag in Germany

Smag has established a strong presence in Germany, particularly in the label printing sector. The company's machinery is highly valued for its precision and ability to handle complex printing tasks.

Client spotlight: Smag in the UK

Smag's machinery is widely used in the UK for various printing applications, including packaging and promotional materials. The company's commitment to customer service and technical support is a key factor in its success.

Client spotlight: Smag in Italy

In Italy, Smag's machinery is used for a variety of printing tasks, from high-speed commercial printing to specialized applications. The company's reputation for durability and performance is well-known in the industry.

Client spotlight: Smag in Spain

Smag's machinery is used in Spain for a range of printing applications, including packaging and decorative printing. The company's focus on innovation and quality continues to drive its growth in the market.

Robos installs Galaxy screen press from Smag

French press manufacturer Smag recently delivered a Galaxy semi-rotary screen press to label converter Robos.

Robos GmbH, near Stuttgart in Germany, is a medium-sized label converter with 65 employees and annual sales of 9 million euros. A lean, family-run business, Robos makes adhesive labels mainly for the medical and pharmaceutical sector, and screen printing is an essential part of the company's stock-in-trade.

'Our German-made screen printing

machines are used in various countries, from France to the UK. The Galaxy screen press is a key piece of equipment for Robos, enabling them to produce high-quality labels for their clients.

presses were coming to the end of their life,' explained owner-manager Harry Reuter. 'We needed a high-performance, modular screen press which could be cost-effective for short and medium runs – the best choice turned out to be a Galaxy semi-rotary machine from Smag.' Robos opted for the 3-color version with UV/IR curing, a laminating unit and semi-rotary die-cutting, a print format of 340 x 340mm and operating speed of 4000 cycles/hour (around 15 meters/minute).
